📍 Sfax, Tunisia

🌐 zaineb zouari

PROFILE

AI engineer specializing in deep learning, LLMs, and data-driven systems, with experience delivering complex AI solutions in research and industrial environments.

EXPERIENCE

Deep Learning Intern - Medical Imaging, CREATIS Laboratory – INSA	<i>Lyon, France</i>
- Final-year neuroimaging project on MRI-based Multiple Sclerosis lesion segmentation, covering both single-timepoint and longitudinal analysis and integrated into a web application. - Technologies: nnU-Net, LASNet, DWB, PyTorch, MONAI, Python, Linux, HPC/GPU clusters	<i>Apr. 2025 – Sep. 2025</i>
Test and Validation Engineering Intern, Primatec Engineering	<i>Sfax, Tunisia</i>
- Developed an automated data pipeline for vehicle testing, including structured data storage, validation, and reporting, with results exposed through a web-based analytics dashboard. - Technologies: Python, Pytest, MySQL, ReactJs, Flask, Gitlab, Jenkins	<i>Jul. 2024 – Aug. 2024</i>
Web Developer Engineer Intern, All Soft Multimedia	<i>Sfax, Tunisia</i>
- Developed a web application for efficient supermarket price verification, enabling users to quickly check and validate product prices to ensure accuracy and consistency. - Technologies: Microsoft SQL Server, .NET, Angular, Swagger	<i>Jun. 2023 – Jul. 2023</i>

PROJECTS

Autonomous Multi-Agent AI Career Agent	<i>Feb. 2026 – Mar. 2026</i>
- Engineered an autonomous multi-agent recruitment system for web scraping and job discovery, integrating RAG and local LLMs for automated semantic profile matching and scoring. - Technologies: Agentic AI (CrewAI), Selenium, RAG (ChromaDB), Ollama, Python, Streamlit, Docker	
LLM Specialization & Deployment	<i>Dec. 2025 – Jan. 2026</i>
- Full LLM pipeline: Knowledge Distillation (GPT-4o), SFT LoRA on Qwen 2.5-1.5B, press agency tasks (NER, summarization, translation), JSON validation with Pydantic, vLLM deployment (PagedAttention). - Technologies: Python, Hugging Face, LLaMA-Factory, vLLM, Pydantic, WandB, Colab GPU	
Brain Tumor Segmentation	<i>Nov. 2024 – Dec. 2024</i>
- Development of an automatic 3D brain tumor segmentation model using 3D U-Net and Python. - Technologies: Deep Learning, U-Net, Python, TensorFlow	
Driver State Prediction	<i>Oct. 2024 – Nov. 2024</i>
- Development of a driver behavior classification model to ensure safe driving. - Technologies: Deep Learning (CNN: AlexNet, VGGNet, ResNet), Flask, OpenCV	

TECHNICAL SKILLS

AI & DL: LLMs, Transformers, RAG, Prompt Engineering, AI Agents (LangChain/LlamaIndex, MCP), YOLO, ResNet, U-Net/nnU-Net, Diffusion Models, PyTorch, OpenCV, TensorFlow/Keras, scikit-learn, MONAI
Web & APIs: Flask, REST APIs, ReactJS, Angular, .NET
Programming Languages: Python, C, C++, C#, Java, JavaScript, TypeScript
DevOps & Systems: Git, GitHub, GitLab, Jenkins, Cloud, Docker, SQL Server, MySQL, Firebase, Linux, HPC (CUDA)

LANGUAGE SKILLS

Arabic: Native **French :** Advanced **English :** Upper-Intermediate

CERTIFICATIONS

- Supervised Learning par Andrew Ng - Coursera. - Microsoft Azure AI Fundamentals. - TOEIC – B2 Level (ETS Global). - AI Agents & Agentic Systems (DataCamp)	- Fundamentals of Deep Learning – NVIDIA - Generative AI with Diffusion Models – NVIDIA - Docker Basics - 2S Training and Consulting
--	--

SOCIAL ACTIVITIES

- Secretary of the IEEE Circuits and Systems Society - Challenger and ambassador of Hack4IOT hackathon - Participation in TSYP10 and TSYP11 events	- Participation in IEEEEXTREME 16.0 and 17.0 problem-solving competition - Manager of Industry 4.0 Forum - I4S
--	--

EDUCATION

National School of Electronics And Telecommunications <i>Engineering cycle in electronic and communication- Connected Systems– Ranked 1st in class</i>	<i>2022–2025</i>
Preparatory Engineering Institute <i>physics and chemistry pre-engineering cycle</i>	<i>2020–2022</i>
Pilot High School <i>Baccalaureate in Science, with honors.</i>	<i>2016–2020</i>
Pilot Middle School	<i>2016</i>
